

TECHNICAL DATA SHEET

PRODUCT NAME : POTASSIUM CHLORIDE 99% MIN.
FOMULA : KCl
APPEARANCE : White Powder
APPLICATIONS : The majority of the potassium chloride produced is used for making fertilizer, since the growth of many plants are limited by their potassium intake. As a chemical feedstock, it is used for the manufacture of potassium hydroxide and potassium metal. It is also used in medicine, lethal injections, scientific applications, food processing, and as a sodium-free substitute for table salt.

PROPERTIES	SPECIFICATION
Purity	99.00% min.
Potassium Oxide (K ₂ O)	60.00% min.
Sodium Chloride (NaCl)	2.00% max.
Calcium Chloride (CaCl ₂)	0.10% max.
Magnesium Chloride (MgCl ₂)	0.30% max
Insoluble	0.02% max.

PACKING : 25 KG/BAG
ORIGIN : German & Israel
